Ist International Conference on Coastal Biotechnology and 8th Asia-Pacific Conference on Algal Biotechnology

9–12 JULY 2012 Adelaide Convention Centre, Adelaide Australia

It is important to realize that coastal biotechnology is developing fast with exciting achievements being realized in biological, chemical, and environmental sciences and technologies. The aim of the 1st International Conference on Coastal Biotechnology (1st ICCB) on "Coastal Biotechnology for sustainable development" is to bring together the international community working on coastal biotechnology issues, to help strengthen connections in this highly interdisciplinary field, and to inspire new research and development from the scientific and industrial sectors.

The ICCB Program will run from Tuesday 10 July to Wednesday 11 July 2012.

SESSIONS INCLUDE

Changing distribution pattern of coastal bio-resources

- Coastal and marine bio-resources
- Conservation biology
- Coastal and marine biogeography and phylogeny
- Large marine ecosystems

Coastal biotechnology: facing the global and regional changes

- Sustainable aquaculture
- Fisheries and co2 sequestration effects of coastal reclamation on bio-resources
- Biotechnologies of salt tolerant plants

IMPORTANT DATES

- Call for abstracts now open
- Registration now open
- Deadline for abstracts: April 14th 2012
- Early bird registration closing: May 25th 2012
